

# Rigid Steel Conduits (BS Standard)

Safe • Durable • Compliant

Al Jazera Factories for Steel Products Co. Ltd (JASCO) manufactures high-quality rigid steel conduits conforms to British standard (BS) designed to protect and route electrical wiring across commercial, residential, and industrial projects. Our conduits comply with BS Standard, ensuring full adherence to international electrical safety standards.

BS conduits deliver excellent mechanical protection and corrosion resistance—making them ideal for both indoor and outdoor applications.

### Notes

- Available in various sizes, typically from 20mm to 75mm in diameter.
- Other lengths are available upon request.
- Diameter Tolerance  $\pm 0.2\text{mm}$ .
- Threaded couplings are used to connect conduit sections.
- British Standard Pipe (BSP) thread.

Nominal Size	Standard Length
mm	mm
20	3750
25	3750
32	3750
Up to 75	3750

### Benefits

**High strength**  
Can withstand heavy loads and impacts.

**Corrosion resistance**  
Protects electrical wiring from moisture and chemicals.

**Versatility**  
Suitable for a wide range of applications.

**Easy installation**  
Threaded connections allow for quick and easy assembly.

### Some Applications

Industrial electrical installations

Commercial buildings  
(offices, malls, warehouses)

Outdoor wiring systems

Data centers & IT infrastructure
